

Vector® Helmet

Providing superior impact protection in a lightweight, comfortable and affordable helmet.

Superior Protection

Vector helmets use a full inner shock liner to absorb impacts from the top, front, back, and side. The shock liner is carefully engineered to provide advanced protection with minimal weight. Combined with its heavy-duty polyethylene shell and self-sizing suspension or optional Flex-Gear® ratchet suspension, Vector offers advanced protection at a competitive price. A two-point chin strap and heavy-duty polycarbonate faceshield are available as options.

Comfortable

Vector helmets offer lateral and top impact protection with only a slight weight addition over conventional hard hats. Either the self-sizing VT600 suspension or optional VTRT600 Flex-Gear® ratchet suspension ensures a secure and comfortable fit for virtually all head sizes and shapes. The standard Sportek™ brow pad is the most absorbent and comfortable brow pad available.

Customizable

Vector helmets can be decorated with your company's logo using up to six colors in as many as eight different locations. Available colors include: white, yellow, orange, red, Kentucky blue, navy blue, forest green, hi-viz orange, and hi-viz yellow.

Economical

Vector helmets offer advanced head protection and comfort at an affordable price. The lightweight Vector helmets are compliant with ANSI/ISEA Z89.1-2014, Type II, Class E & G and CSA Z94.1-2015, Type 2, Class E & G. The Sportek brow pad, comfortable suspension, built-in goggle strap retaining slots, and Bullard's unsurpassed reputation for quality make Vector helmets a superior value in industrial head protection.

Vector® Helmet

Suspension Choices

1. **Outer Shell of Polyethylene** – comfortable lightweight design for maximum comfort.
2. **Expanded Polystyrene Foam Core** – reduces the possibility of serious head injury by helping to absorb the forces of impact.
3. **Four-point Suspension System** – straps are angled to fit the head for superior comfort.
4. **Ventilation Channels** – help keep wearer cooler and more comfortable.
5. **Sizing Mechanism** – choose from either the Flex-Gear® ratchet or self-sizing suspension.

Vector meets/exceeds all requirements of ANSI/ISEA Z89.1-2014 Type II, Class E & G and CSA Z94.1-2015 Type 2, Class E & G.
